Representative Corliss, by his attitude against the Mackay cable, has exposed himself to grave misrepresentations.

The news from Martinique grows worse instead of better. It begins to look as if the whole island would be made untenable.

The fact that \$200,000 vanished from the treasury of Tammany Hall just after election prompts the thought that Richard Croker feared the milk business might prove expensive.

As the wild bull which roams the Manoa streets appears to have found no owner in court, his early demise, at the hands of some good marksman, may be reasonably looked for. After that, perhaps the owner will turn up.

There is no great loss without some small gain. The eruption at Martinique, with its widespread fall of hot ashes and fire damp, must have destroyed myriads of the fer-de-lance, the most venomous snake known to man, and indigenous to the stricken island.

In spite of its temporary troubles the Paradise of the Pacific keeps up its record as a handsome and readable periodical. The Paradise used to be subsidized by the government but was never a more attractive and useful monthly than it is now. The hope is general that it may soon adjust its affairs and go on under the Langton management.

The Bar Association takes the proper attitude in regard to admissions to the practice of law. Since Humphreys began by letting in most of the Home Rule Legislature and lately made a "lawyer" of a disreputable Chinese, the need of some kind of safeguards from such judicial misconduct has been plain. The next Legislature will be pressed to leave the admission of laymen to the bar to a board of examiners as is done in the States.

## SENSATION IN MADRID.

A Purported Attempt to Kill the Young King of Spain.

MADRID, May 17.—What at first appeared to be an attempt to assassinate King Alfonso XIII was made today. The splendid ceremonies with the attending of his majority by King Alfonso were attended by an incident which created considerable excitement among those who witnessed it, and in the Chamber of Deputies, where the story was first told, it created a profound sensation.

It appears that just as the royal coach emerged from the Plaza de Armas into the square in front of the palace, amid the sound of cannon, a young man among the sightseers behind the cordon suddenly pushed through the ranks of soldiers and police and rushed toward the door of the coach. He held his hat in one hand and in the other, which was outstretched, was a paper.

Before he reached the door one of the guards who was walking beside the coach and other state lackeys and courtiers hurried to the scene and quickly overpowered him, though not before the disturber had received a severe mauling.

"Assassin! Assassin! Kill him!" were the cries that went up from thousands of throats.

The excitement of the volatile Spanish crowd when it witnessed what appeared to be an attack on the life of their young monarch was intense. The foremost men rushed toward the rash man, and were held in check with the greatest difficulty by the troops which lined the route of the royal procession. The man's life was threatened at every step as he was led away by a crowd of soldiers and taken to prison.

But it was over in a moment, and before anyone thoroughly appreciated what had happened the man had been dragged away and all signs of a disturbance had vanished.

## The Cuban Republic.

NEW YORK, May 22.—English press comments on the inauguration of the Cuban Republic provide interesting reading, cables the London correspondent of the Tribune. The expectation is generally expressed that the infant republic will at no very remote date be absorbed into the United States on the ground that the islanders had proved their unfitness to govern themselves when they had a fair trial. The meaning of this is that few people here ever seriously imagined that the independence of Cuba would become an accomplished fact, and although the United States is heartily congratulated on the fulfillment of its pledge, most editorialists suggest that Uncle Sam will gladly welcome any opportunity that will give him excuse for adding the Pearl of the Antilles to his property.

## The Danish Islands.

COPENHAGEN, May 21.—The Politikon is authority for the statement that the United States Secretary of State has promised an extension for one year, until July 1, 1920, of the time allowed for the ratification of the treaty for the sale to the United States of the Danish West Indies. There is little doubt, adds the paper, that King Christian will agree to the proposal.

## Refinery for Spreckels.

NEW YORK, May 17.—A new sugar refinery with a capacity of 1000 barrels a day is to be located on the Hudson river a short distance south of Yonkers. It will be owned by the Federal Refining Company, of which C. A. Spreckels, son of Claus Spreckels, the "Sugar King," is the president.

## High Priced Autos.

NEW YORK, May 22.—R. R. Rainey has paid \$18,000 to Baron de Rothschild of Paris for an automobile. This is the highest price so far recorded for a machine.

On Tuesday he felt weary while down town and while attempting to mount the stairway to Colonel W. F. Allen's office was compelled to give up the trial and went home. Dr. Galbraith was called and pronounced Mr. Hasinger suffering from heart trouble. Dr. Galbraith has been in constant attendance on the patient. He was kept quiet during all of yesterday and none of his friends were permitted to see him.

UPPER AIR LEVELS  
FOUND WARMER

BERLIN, May 22.—Tetescence De D'Port of Paris has submitted the results obtained in the ascent of twenty-eight balloons, when altitudes of 11,000 meters or more were attained, to the International Aeronautical Commission. The thermometrical apparatus employed in these ascents recorded the presence of warmer atmosphere above 10,000 meters, having well-defined boundaries. Privy Councillor Ardmann of Berlin has confirmed this statement made by M. De Port. The professor sent rubber balloons to the altitude of 19,500 meters which traversed a warm atmospheric belt between the heights of 11,000 and 13,000 meters.

Count Palazzo of Rome, of the Italian division of the commission, announced that Italy will join in the commission's investigations of atmospheric conditions and said that the Italian Government is erecting an observatory for this purpose on top of Monte Rosa (in the Pennine Alps, altitude 12,125 feet). Count Palazzo also said that this observatory will be used for experiments in the matter of curing tuberculosis by high altitudes.

TIMES MAKES  
THE BEST OF IT

LONDON, May 22.—The Times, in an editorial defining the shipping combine, contends that British shipping companies could not have taken a more patriotic course. The Times says: "We have gone far to settle the question of food supply in war times, because the Americans now will be directly interested in the safety of grain cargoes until they reach our shores. Auxiliary cruisers are very good things to amuse the public with, but their actual value in case of war is an unknown quantity. The right thing for the British navy is to have its own scout and dispatch boats and not to rely upon amateur performances by vessels designed for different work. We suspect that the admiralty does not privately regard the auxiliary cruisers with the enthusiasm it is its fashion to affect in its utterances which are intended for the public."

## Spies in Russian Pay.

VIENNA, May 22.—Two Russian spies, Zaleski and his step-father, Schuchester, have been sentenced to four and a half and three and a half years at hard labor, respectively. Zaleski and Schuchester were formerly in the Austrian army. The evidence showed that they had been in Russian pay for years, and that they had communicated to Russia not only the plans of mobilization of Austrian troops, but that they had supplied exact plaster and clay models of fourteen Galician fortresses.

## A Cardinal's Compliments.

NEW YORK, May 22.—Cardinal Martinelli, in an interview with the Rome correspondent of the Tribune, said: "My sojourn in America will be one of the brightest recollections of my ecclesiastical career. I shall never forget the states where I was the object of such true courtesy, and where the people are so loyal, frank and true. I shall consider America my second country."

## Baron Munchausen Wins.

BERLIN, May 22.—Baron Munchausen, a member of the family of the famous story teller, has attained distinction in the German racing world by winning the Jubilee purse of 16,000 marks (\$4000) at the Hoppegarten course, with Kolibri, a selling plate, ridden by "Nate" Hill, the American jockey. Kolibri finished a nose ahead of the two favorites in the contest, who ran neck and neck.

## Itching Skin

Distress by day and night —

That's the complaint of those who are so unfortunate as to be afflicted with eczema or salt rheum — and outward applications do not cure. They can't.

The source of the trouble is in the blood — make that pure and this scaling, burning, itching skin disease will disappear.

"I was taken with an itching on my arms which proved very disagreeable. I concluded it was salt rheum and bought a bottle of Hood's Sarsaparilla. In two days after I began taking it I felt better and it was not long before I was cured. Have never had any skin disease since." Mrs. Ida E. Ward, Cove Point, Md.
